1. Introduction

1.1. Purpose of the document

The purpose of the present document is to collect, analyse and report on the EIT's website data and highlight key metrics of its web performance. This report contains a review of the Matomo (Piwik) web analytics (the open source software for tracking traffic to the EIT website) for September 2020.

1.2. Analytics Glossary

The following table (Table 1) presents an introduction to Web Analytics terms that are used in the report.

Table 1: Analytics Glossary

Term	Description
Visit	A visit is a single visitor who arrives at the website and proceeds to browse. If more than 30 minutes elapsed between page views for a single visitor, then Matomo records this as a new visit.
Unique visitor	Unique visitors are measured according to their unique IP addresses and are counted only once, no matter how many times they have visited the website.
Page view	An instance of a page being loaded (or reloaded) in a browser. A page view is a metric defined as the total number of pages viewed.
Unique page view	Refers to the number of times a page was accessed during a visit (session). If a page was viewed multiple times during one visit, it is only counted once.
Time on page	The average amount of time that a visitor spent on a page. The average time on page is calculated by dividing the time on page by the number of page views minus the number of exits from the site.
Bounce	Also referred as single page view visit, the bounce is a visit that consists of a single page view.
Bounce rate	The percentage of single page view visits (i.e. sessions in which the visitor left the site from the entrance page without interacting with the page).
Downloads	The files visitors have downloaded. What Matomo counts as a download is the click on a download link. Whether the download was completed or not isn't known to Matomo.
Unique downloads	The number of visits that involved a click on a download link. If a link was clicked multiple times during one visit, it is only counted once.
Outlinks	An outlink is a link that leads a visitor a way from the website (to another domain).
Average visit duration	The average duration of a visit.

Actions	The number of actions performed by your visitors. Actions can be page views, internal site searches, downloads or outlinks.
Actions per Visit	The average number of actions (page views, site searches, downloads or outlinks) that were performed during the visit.
New Visitors	New visitors are those navigating to the website for the first time on a specific device.
Returning visitors	Returning visitors have visited the website before and are back again.
Landing page	A web page which serves as the entry point for a website or a particular section of a website.
Exit page	The last page a visitor views before leaving the website.
Searches	The total number of search queries for which pages of your website was shown in organic search over a given period of time.
Top pages	The top pages of a website appearing in organic search results.
Search engines	A visitor was referred to the website by a search engine.
Direct entry	A visitor has entered the URL in their browser and started browsing on the website - they entered the website directly.
Websites	The visitor followed a link on another website that led to the website.
Campaigns	Visitors that came to the website as the result of a campaign.

1.3. Structure of the report

Chapter 1 presents the purpose of the document and an analytics glossary with descriptions for each term used in this report. Chapter 2 of the report presents an overview of the visit evolution to the EIT website. Chapter 3 contains information on the distribution of the referrer types and their key performance metrics. Finally, chapter 4 contains information and key metrics on the actions visitors performed on the EIT website.

2. Visitors

This is an overview of the visit evolution to the EIT website. If a visitor came to the EIT website for the first time or if they visited a page more than 30 minutes after their last page view, this was recorded as a new visit.

In summary, during September, the EIT website recorded a total of **114,717 pageviews** and **52,001 visits**. The average bounce rate during that period was **57%** (typical bounce rate in content sites averaging between 40% and 60%)¹.

2.3. Browsers and Operating Systems

In terms of the most popular browsers, **Google Chrome** accounted for **51%** of all visits with **Mobile Safari** and **Firefox** being second with **9%** of all visits.

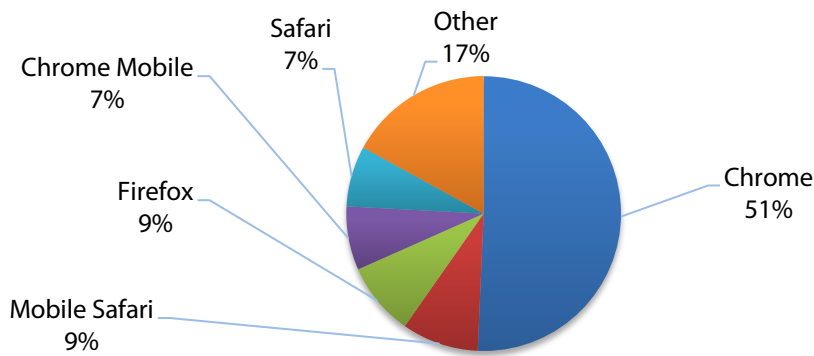

Figure 2: Browsers

In addition, most visitors visited the EIT website using the **Windows 10** operating system (**53%**) with **iOS 10.15** visits following with **9%**.

Figure 3: Operating Systems

3. Referrers

In terms of referrals, the EIT website was mostly accessed via search engines (**45% of visits**), and direct entries (**35% of visits**), while **9%** of the visits were from social networks.

This table contains information on the distribution of the referrer types.

Table 6: Referrer Types

4. Actions

This chapter contains information and key metrics on the actions a visitor performed on the EIT website. An action is counted whenever a visitor visits an EIT website page, clicks on a download link or on an external link, whenever an event is tracked, or when a visitor search on the EIT search bar.

In terms of actions, visitors to the EIT website performed **2.6 actions per visit**, had an average **visit duration of 2 min 32 sec** and performed **114,717 pageviews**. In total, visitors **downloaded 8,072** documents and performed **1,072 searches** on the website.

4.1. Returning Visits

A returning visit (as opposed to a new visit) is made by someone who has visited the EIT website at least once before. This section presents the key metrics of returning visitors to the EIT website.

On average, 36% of all visits during September were **returning visits (18,077 returning visits)** which resulted in **53,934 actions** during the reporting period.

⁴ Due to readability issues, Figure 4 includes the data of the last five months, September data included.
